MOUNT MEDolutions

July 2025

/ Your Life-Changing Path to Health

MOUNT MEDolutions represent a groundbreaking fusion of integrative diagnostics, advanced recovery and precision prevention, seamlessly combined with sports, performance and the Mylife Changer® method with its revolutionary nutritional concept.

Holistic approach

At Mount Med Resort, the Mylife Changer® method is applied holistically, beginning with comprehensive integrative diagnostics and the Metabolic Blueprint – a detailed analysis of metabolism, biological age, fat utilisation, heart and lung fitness, posture and breathing. Based on these findings, a guest's individual nutritional level within the metabolic programme is determined. This is a three-phase approach (Intensive, Stabilisation and Maintenance) that ensures a smooth transition into everyday nutrition. The anti-inflammatory approach prevents imbalances and eliminates the risk of the 'yo-yo effect', making long-term success achievable. More than just a fasting method, Mylife Changer® serves as a catalyst for a healthier life, promoting lasting weight management and a positive impact on biological age.

The programme is further enhanced by a combination of manual and device-based treatments, signature infusion therapies and tailored exercise. Specially developed herbal tonics and nutrient supplements support detoxification and recuperation, while neuroscience biohacking helps to break old behavioural patterns and establish lasting, positive changes at a cellular level.

Medical supervised time-out

MOUNT MEDolutions are holistic solutions focused on the individual needs of our guests. At the Medical Spa, a team of doctors, experts and health concierges take exclusive care of you and guide you through your customised journey.
